Phase First Difference

Post GUI State Get GUI State

What's the problem?

- Unable to save states
- No database connection
- Unable to record student answers to a database
- Unable to grab states from database
- GUI doesn't update in real time
 - Slider <--> input, slider -> graph

What we want

Tech Stack

Labor Division

Will - GUI, React

William - SQL, Node/Express

Bandhan - SQL, CSS

Front end

Goal

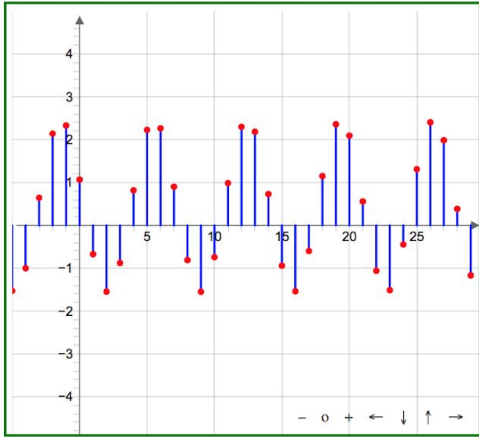

plain

Tools

LCT framework

Controls

First Difference ▾

Amplitude

2

Frequency (* 2pi)

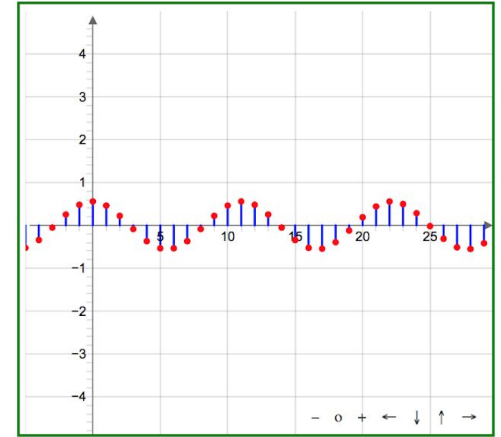

0.91

Phase (* pi)

0.4

DC Level

0.45

```
this.board = brd;  
this.points = [];  
this.stems = [];
```

Controls

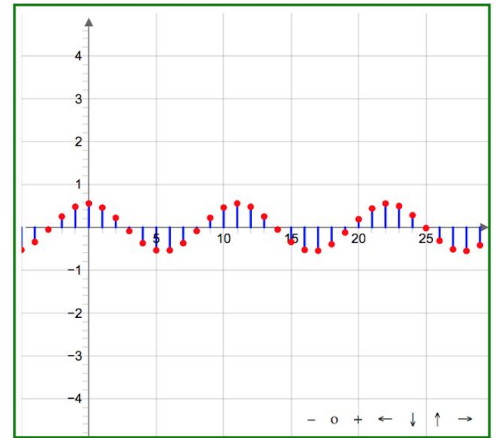

First Difference ▾

Amplitude

Frequency (* 2pi)

Phase (* pi)

DC Level

```
let arbitrary = (x) =>  
(Math.cos(x: this.state.freq * x+ this.state.phase * Math.PI)  
 * this.state.amp + this.state.dc*1);
```

Back end

Implementation

- MySQL Database
- Node.js/Express/Cors

```
var con = mysql.createConnection({
  host: "localhost",
  user: "root",
  password: "password",
  database: 'labs',
});

con.connect(function(err) {
  if (err) throw err;
  console.log("Connected!");
});
```

Student_id	Lab_id	Question_number	Variable1	Variable2	Variable3	Variable4	Variable5
1234	1	1	2.11	0.79	0.45	0.22	1
1111	1	1	2.65	1	0.77	0.56	1
999	1	1	2.35	1	0.24	0	4

DEMO

Future Implementations

- Frontend additions
 - Mathjax and equations on top of the GUIs
 - Better UI
- Backend additions
 - Update tables with appropriate changes to fit all labs
 - Grab a state from the database
 - Fix backend bugs

Reflection

- Difficult switch from original DLTI to React template (took about 1/3 of semester)
- Challenges
 - Frontend: Lack of React experience
 - Backend: Starting from nothing, learning new tools (SQL, Node, etc.)
- Accomplishments
 - Code is in standard React template
 - DLTI lab demo is moving forward in terms of getting data/answers from students
 - Database implementation

THANK YOU
